

MAYUR BHAUSAHEB GUND

Shirdi, Maharashtra, India | +91 93223 02943 | mgund1920@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Backend-focused Software Engineering student with hands-on experience building and deploying full-stack web applications using Python, Flask, and SQL databases. Proven ability to design efficient data structures and algorithms (e.g., Min-Heap-based scheduling), ship production-ready projects independently and in teams, and write clean, well-documented code. Seeking a Software Engineer Internship to apply strong problem-solving skills and contribute to real-world engineering challenges.

EDUCATION

B.Tech in Computer Engineering | 2025 - 2029 (Expected)

Sanjivani College of Engineering, Kopergaon

CGPA: 9.6 (First Year) | FFE - Synopsys Scholar'29

HSC - PCMB | 2023 - 2025

K. B. Rohamare Junior College

Percentage: 85.83%

SSC | Completed 2023

Sanjivani English Medium School, Sahajanandnagar

Percentage: 91.00%

TECHNICAL SKILLS

Programming Languages: C, C++, Python, JavaScript

Frameworks & Libraries: Flask, Streamlit, Bootstrap

Databases: MySQL, PostgreSQL, SQLite3

Tools & Platforms: Git, GitHub, Claude Code, Cursor, Replit

Core Concepts: Data Structures & Algorithms, REST APIs, Full-Stack Web Development

PROJECTS

InvenTrack - Pharmaceutical Inventory Management System | Python, Flask, SQLite, Min-Heap Algorithm

github.com/engineermayur-07/InvenTrack-Inventory-Management-System

- Engineered a full-stack inventory system for businesses handling perishable goods (pharmacies, cloud kitchens) to optimize stock rotation via FEFO (First-Expiry-First-Out) logic.
- Designed an in-memory Min-Heap cache to track expiration dates in $O(\log n)$ time, eliminating the need for repeated heavy database sort queries.
- Implemented secure OTP-based authentication and batch-level tracking; deployed the application on PythonAnywhere for live access.

ScholarDesk - Unified Academic Command Center / *Python, Flask, SQL, Bootstrap*

github.com/engineermayur-07/ScholarDesk-Web-App

- Built a production-grade, enterprise-style monolithic web platform consolidating notes, calendar, expense tracking, and AI assistance into a single student workspace.
- Designed a high-contrast, responsive UI to eliminate the cognitive overhead of switching between fragmented productivity apps.
- Collaborated with a co-developer to architect and integrate multiple modules into one seamless cloud ecosystem.

Safarnama - AI-Powered Travel Planning Platform / *Python, Streamlit, Gemini 2.5 Flash API, Geodetic APIs*

github.com/engineermayur-07/Travel-Planning

- Developed a full-stack travel planning application integrated with Google's Gemini 2.5 Flash API to power a built-in AI travel concierge.
- Replaced rigid, pre-packaged tourism itineraries with dynamically calculated, fully customized trip plans using geodetic positioning automation.
- Built both CLI and web interfaces to broaden accessibility across user preferences.

Crop Disease Detection - AI Plant Pathology Assistant / *Python, Machine Learning, Image Processing*

github.com/engineermayur-07/Crop-Disease-Detection-

- Co-built (Team Bug Hunters) a mobile and web platform that analyzes leaf images to instantly identify agricultural pathogens.
- Replaced slow, manual expert inspection with real-time automated diagnosis, reducing potential crop loss for farmers.

ACHIEVEMENTS & SCHOLARSHIPS

- FFE - Synopsys Scholar'29: Selected for the prestigious Foundation For Excellence Scholarship.
- Tata Capital Pankh Scholarship'24: Selected for merit-based scholarship awarded by Tata Capital.
- MHT-CET (PCM): Scored 99.079 percentile, All-India Rank 3038.
- MHT-CET (PCB): Scored 99.29 percentile, All-India Rank 2375.

CERTIFICATIONS

- Problem Solving through Programming in C - NPTEL, Elite (Score: 60/100).

DECLARATION

I hereby declare that the information provided above is true and accurate to the best of my knowledge and belief.
